Gary

Tank 7

Tank 7 has been cleaned and demo.
All the metal will be removed for scrap by this coming Monday.
We will start profiling the bottoms from tank 7 for disposal.

Next week we will obtain samples from tank 13 water and start getting materials together to start treating the water.

We will also be installing the last section of fence to secure the tanks on site,

As we work on tank 13 water we will also continue to remove any material from piping.

Steve:

Can you give me an update on the following:

- Tank 7
- Tank 13
- Refinery Piping/Equipment Evaluation/Removal
- Asbestos Evaluation/Removal
- Final Report Plan.

Thanks
